

## OUR BUSINESS CONTINUITY POLICY

Sanver Mühendislik Elek. Elektr. Bilg. Sis. Mak. San. Ve. Tic. LTD. ŞTİ, operating in the fields of **“Industrial Automation Systems and Project-Based Machine Manufacturing,”** undertakes to comply with the following principles while determining and maintaining strategies, plans, and practices developed to ensure business continuity in the face of extraordinary situations and crises, ensuring customer satisfaction, service continuity, and fulfillment of legal obligations:

- The organization will identify and assess potential business interruption risks and take appropriate measures against these risks. Risk analysis will be reviewed annually and updated when necessary,
- Develop business continuity plans for possible emergencies and carry out regular drills and tests to ensure the effectiveness of these plans,
- Determine the critical functions that will ensure the sustainability of operations and provide the necessary resources to ensure these functions continue without interruption,
- Inform about effective communication procedures to prevent disruptions in communication during emergencies,
- Continuously review and improve business continuity processes,
- Comply with all applicable legal regulations and sectoral standards in the implementation of business continuity processes,

This has been adopted as the Business Continuity Policy.
