

## OUR INFORMATION SECURITY MANAGEMENT SYSTEM POLICY

Our company, operating in the field of **“Industrial Automation Systems and Special Machine Manufacturing,”** has established the Information Security Management System to protect the confidentiality, integrity, and availability of its own information assets and the data of our customers within the scope of projects. In accordance with the purpose and context of the organization and to support its strategic direction, our company commits to the following in order to maximize this system:.

- Managing information assets within processes, identifying risks related to these assets, and implementing effective risk management by developing controls for these risks,
- Reducing the impact of information security threats on our business continuity,
- Protecting our company from adverse effects that may arise from information security breaches,
- Responding to possible information security incidents effectively and quickly and minimizing their impacts,
- Complying with all applicable legal and other requirements related to Information Security, and meeting the information security requirements of internal and external parties,
- Following technological expectations and developments within the scope of the Information Security Management System,
- Improving employees' awareness of information security,
- Ensuring information security in accordance with the ISO 27001 Information Security Management System standard, and achieving continuous improvement based on new risks, developments, and incident records related to information security.
